

## • Lights, Camera, Learning! •

**Presenters: Chris Knippenberg/Kathryn Whitaker**

Interested in using video modeling and other digital tools to support children of all ages and adults with developmental delays? iPads and Smartphones are fantastic tools for creating fast, easy, and powerful visual supports for teaching daily routines, previewing new activities, learning social skills, and creating student-focused materials. In this workshop you will learn to use 3 free or low-cost apps and then create storyboard stills and videos, easy digital books, and short videos. Participants will use their own photos and videos to create supports they can use immediately for a focus student. Learn how to get the most out of your device to take advantage of the power of visual images in supporting learning in this hands-on lab workshop.

**Date:** January 23, 2015

**Time:** 8:30-3:30

**Place:** Capitol Plaza, Montpelier, VT

**Cost:** \$175 (includes lunch)
