

## • Improving the Universal Access to Tiered Instruction & Supporting the Learning of All Students •

*Presenters: Jennifer Patenaude & Chris CichoskiKelly*

### **Technology & UDL**

Universal Design for Learning focuses on three principles that have been covered in each of the past three workshops – the “why”, the “how” and the “what” of learning. These key principles are also known as: how to engage students, how to present information in different ways, and how to allow students to show what they know in different ways. Technology can be the framework for allowing all of this to happen with all of your students. This session will build on the previous three workshops and will emphasize strategies and technology integration to help support students’ increased engagement in learning and to allow for educators and students to present information in multiple ways.

<b>Date:</b>	<b>May 15, 2015</b>
<b>Time:</b>	<b>8:30-3:30</b>
<b>Location:</b>	<b>Capitol Plaza Montpelier, VT</b>
<b>Cost:</b>	<b>\$175.00 (lunch included)</b>
