

**VERMONT  
HIGHER EDUCATION  
COLLABORATIVE**

## Using Technology to Assist the Struggling Learner

**Presenter: Chris CichoskiKelly**

**Back by Popular Demand with Updates,  
New Tools, Programs and Apps!**

This three-part workshop series or four-part graduate credit course (choose to participate either way) will examine how educators utilize technology to increase students' independent learning and their access to the curriculum. We will examine and explore:

- a process for educators and team to help determine which technology to trial and how to collect meaningful data on its impact
- powerful technology tools to help students read, write and take notes
- specific case studies with time for focus group work around individual learning challenges
- resources to help find additional technology to support students

Between the three sessions participants will be able to trial technology with their students and receive direct feedback from their instructor. This workshop/course is designed for educators, special educators and para-educators interested in learning how to use technology to enhance their students' learning.

### COMMENTS FROM LAST YEAR'S PARTICIPANTS...

"LOTS OF INFO TO ABSORB –  
WOW!"

"I LEARNED ABOUT WAYS TO  
USE MY IPAD THAT I HAD NO  
IDEA I COULD DO."

"WILL GO BACK AND LOOK AT  
RESOURCES AT MY OWN PACE –  
LINKS ARE GREAT."

"ONE OF THE BEST CONFERENCES  
I HAVE BEEN TO IN A LONG  
TIME."
