

• **Creating Fast, Effective Photo and Video Supports for Participation, Transition, and Learning** •

Presenters: Chris Knippenberg & Patty Thomas

Who should attend: Teachers, special educators, parents, community providers, related service providers, paraeducators, employment coaches, and others

Visual information can be a powerful tool in supporting understanding, self-regulation, and participation across home, school, work, and community. This day-long, hands-on workshop will teach participants how to use photos and video to create immediate and long-term supports such as choice boards, task routines, social stories, and visual journals. These materials support individuals with autism spectrum disorders and other developmental and learning differences and can be easily incorporated into a Universal Design for Learning approach.

Participants are encouraged to come in small teams with a target individual's learning needs in mind, and bring photos or short videos that they can use in their projects. Participants will plan and create a number of different solutions and will leave with templates as well as materials that they can use immediately. A smartphone or tablet with video capability is required. Specifications will be sent upon registration.

Date: November 13, 2015

Time: 8:30-3:30

Place: Capitol Plaza, Montpelier, VT

Cost: \$175 (includes lunch)
