

• Integrating Technology Tools to Maximize Learning •

Instructor: Chris CichoskiKelly with Special Guest Mike Berry

*"Your Google Tools course last summer was one of the best courses I've ever taken."
Participant from Summer 2016*

Jumpstart the school year using technology in new & better ways! Technology tools can help you be more efficient & effective no matter the age of your students, the content you teach or the setting in which you work. Use them to plan schedules, design lessons, develop assessments, organize data and track learning targets & student progress. Integrate these tools with social media to improve communication with colleagues, students, and families, as well as help inform your community about your students & school.

Learn, Practice & Apply

- Learn... about Google Classroom & Tools, assessment tools that can save you time, tools to track student progress, and social media strategies to help motivate students and demonstrate their progress
- Practice... using these tools to meet your needs and help improve your students' learning and engagement
- Apply... and tailor these tools for use with your students in your setting

Special guest Mike Berry will join us over three days to share his expertise using social media and dissemination tools. Mike & Chris will provide individual consultation for designing and completing final projects that incorporate these tools into your work this fall.

"This course was amazing!! The knowledge I gained has been so incredibly useful and we can see that it is clearly benefiting the students."

Dates: August 7-11, 2017 and a follow-up
October 28, 2017

Place: Best Western - Waterbury, VT
