

Using Neuroscience to Make Standards Work for ALL Students

*WORKshops Designed by Bill Rich, Susie Girardin & Wendy Cohen
for Middle & High School Educators & Leaders*

Crafting Student-Friendly Learning Targets

Head spinning from all the “new” standards (Common Core, Next Gen, School-Wide Expectations, Graduation Requirements, etc.)? Imagine how our students are feeling! This workshop is designed to help educators unpack standards into student-friendly learning targets that empower students to determine where they are in their learning and what next steps they need to take toward meeting and exceeding the standards that matter most in our setting. **January 31, 2014, VSBIT, Berlin, VT - Workshop \$175)**

Designing Performance Tasks to Power Student Learning

Get Your Students Pumped for Practice: What makes athletes engage so seriously during practice? They’re preparing for a Big Game. This workshop will support teachers as they design performance tasks of all shapes and sizes, be it an interdisciplinary performance task a’ la SBAC, a capstone for your school’s graduation requirements, or a simple end-of-unit performance task. After studying models and considering why the brain engages so fully in performance tasks, participants will spend most of the WORKshop designing and creating performance tasks to use with their students, while receiving timely feedback on their work. **(March 28, 2014 - VSBIT, Berlin, VT - Workshop \$175)**

Getting To (& Surviving) Standards-Based Grading

Most educators recognize that traditional grading practices undermine learning, but how do we make the switch to better grading practices while we wait for our system to make the switch to standards-based reporting? After studying models and considering why the brain learns best when we emphasize standards-based grading, participants will spend most of the WORKshop re-designing their gradebook and writing a letter to their students that describes the why, what, and how of their new approach to grading. **(April 10, 2014 - VSBIT, Berlin, VT - Workshop \$175)**

Data-Tools to Keep You in Sync with Your Students

Imagine a suite of simple tools that would organize all your assignments & students’ work in one place, enable you to give more timely feedback to your students, and provide you with summaries of the progress of individuals and classes. After experiencing the power of the Google apps—Doctopus, Goobric, and Flubaroo – and other management tools, participants will spend most of the WORKshop using these tools in ways that make sense for them and their students. **(May 9, 2014 - Hampton Inn - Colchester, VT - Workshop \$175)**

Course Option: All 4 workshops + online participation + 1 concluding face-to-face session

Course Cost: \$1395 3 credits from Castleton State College

Instructor(s): Bill Rich, Wendy Cohen, Susie Girardin

Workshops: All workshops from 9:00 – 3:00 @ \$175 each or all 4 for \$600
