

• Cognitive Profile Analysis for Struggling Learners: Advanced Assessment Topics •

Presenter: Jen Patenaude

If you are interested in learning how to use comprehensive evaluation information to deepen your understanding of varied learning disability profiles in order to provide more diagnostic, targeted programming, this workshop is for you! Topics will include: an overview/ comparison of most current measures of cognitive abilities; discussion of the causal relationship between cognitive and academic achievement abilities; selective decisions for choosing the tools that best align with evaluation concerns; a review of common learning disability profiles; and suggestions for subsequent program planning. This workshop is designed for experienced practitioners with a solid foundational understanding of norm referenced assessments and comprehensive evaluations.

Jen has worked for North Country Supervisory Union for the past twenty plus years as a special educator, evaluation specialist, and instructional specialist. She is also an instructor, presenter, internship supervisor and member of VT-HEC Sped Advisory Council (which leads the design and delivery of the annual Special Education and Support Services professional development series). Jen has also led professional development on a multitude of topics for both general education and special education teachers PreK-12 within multiple supervisory unions throughout the state and has served as adjunct faculty for Vermont State Colleges.
