

• **The Why, What, and How of Taking a Brain-Based Approach to Student-Centered, Proficiency-Based Learning** •

WORKshops Designed by Bill Rich

Purpose/Audience: *Designed for middle and high school educators (individuals and/or teams) ready to learn by doing.*

Overview of Series:

This popular WORKshop series has run for years in Montpelier, and now, due to popular demand, we're heading south to Killington. Each WORKshop will begin with compelling activities and findings about the remarkable adolescent brain, followed by guided application devoted to participants accessing resources, ideas, and each other to draft and refine products they'll use back in their settings with their learners. Throughout the series, we strive to model what we teach. One of the greatest compliments we've received came from a participant who wrote, "Your medium is your message." Come learn how to take a brain-based approach to student-centered, proficiency-based learning...by experiencing it.

WORKshop 3: Keeping It Real: The Promise and Perils of Performance Assessment (March 7)

After a brief and compelling exploration of findings from cognitive science that make the case for performance assessment, we'll study a range of examples that show the opportunities and challenges of designing and orchestrating assessments that ask students to use their learning to perform in the world. After studying models and accessing a range of helpful resources, participants will draft / refine a performance-based assessment for their learners.

WORKshop 4: Pulling it All Together: Just How Great Can Learning Get? (May 11)

For this final WORKshop we'll be joined by students and their educators who will show and describe how great learning gets when we use brain-based principles of learning design to create increasingly student-centered, proficiency-based classrooms and school systems. After a morning of digging into the design details of their experiences, we'll bring to bear all we've learned during this WORKshop series to imagine, describe, and tune a vision of just how great learning will be for you and your learners next year.

Dates: March 7 & May 11, 2018
Place: **Change in location to...**
Killington Grand Hotel
Killington, VT
Cost: \$190/workshop
Time: 8:30-3:30 (lunch included)
