

## • Data-Tools to Keep You in Sync with Your Students •

WORKshop Designed by Bill Rich for Middle &  
High School Educators & Leaders

Looking for a better way of tracking and reporting proficiency-based learning?  
Wondering what tool would be best for you, your students, and your school?

This year we will dig into three tools (JumpRope, PowerTeacherPro, Schoology),  
and participants will:

- Wrestle with the question: How do we measure and report learning impact?
- Listen to teams of experts provide a brief (10 mins each) overview of each tool (JumpRope, PowerTeacherPro, and Schoology).
- Choose one of these tools to explore in depth, guided by a pair of experts.
- Contribute to a matrix that compares and contrasts these three tools.
- Identify other tools/approaches that assess and report standards-based learning.

This WORKshop is a great opportunity for:

- ✓ educators who are eager to learn more about these tools; **and**
- ✓ leaders who are exploring what tool(s) will be the best choice in the future; **and**
- ✓ coaches/pd providers looking to hone their understanding of what these tools can do.

**Date:** May 18, 2017

**Time:** 9:00 - 3:00

**Place:** Capitol Plaza  
Montpelier, VT

**Cost:** \$190 (lunch included)
